NEW INDUSTRIAL PLANTS UNDER CONSTRUCTION IN POLAND

HEAT AND POWER STATION UNDER CONSTRUCTION IN ZERAN -- Warsaw, Folks-Sztyne, 4 Aug 53

A gigantic heat and power station is under construction in Zeran, suburb of Warsaw, near the Wisla River.

This station, which will consume 300 tons of coal daily, will supply heat and electricity to many sections of Warsaw, including a series of workers' settlements and quarters, as well as to the Palace of Culture and Science.

In May and June 1953, the workers of the Industrial Construction Union No 4 excavated 10,000 cubic meters of earth, effectuated 3,000 cubic meters of concrete construction, and used 2,700 tons of steel for the construction of this station. They have also done masonry work with 2 1/2 million bricks. Eighteen work brigades have completed 560 cubic meters of reinforced-concrete work.

The construction crews engaged in the building operation have pledged to complete this station in the coming year within the scope of the Six-Year Plan.

NEW STEEL PLANT TO BE CONSTRUCTED IN MLOCINY -- Warsaw, Folks-Sztyne, 1 Aug 53

A new steel plant is under construction in Mlociny, a suburb of Warsaw.

This plant, which will be completed within the Six-Year Plan, will supply very valuable raw materials to such enterprises as the Ursus plant in Warsaw, the Swierczewski plant in Warsaw, the Zeran Motor Vehicle Plant, and other Warsaw metalworking plants.

STAT

The Mlociny site was chosen for the construction of this steel plant because of the proximity of the area to the Wisla River, since thousands of cubic meters of water are required for the operation of the plant.

The construction of this plant was started during spring 1953. Fifty million bricks and 200,000 cubic meters of cement will be used in the construction of this plant. It will have railroad, streetcar, and subway connections with Warsaw. Workers' quarters for this project will be established on a site between Bielany and Mlociny.
